

INVITATION

Master of Film NFTA and Submarine present:

Periscope

On the 16th of February the fourth edition of Periscope will take place. Periscope is a monthly held evening organized by Submarine and the Master of Film. For this fourth edition we invited Dutch creative Sander Veenhof, to introduce us to the world of augmented reality.

Sander Veenhof

Dutch new media artist Sander Veenhof got his degree in computer science at the VU university in Amsterdam and continued to graduate at the Instable Media department of the Rietveld Art Academy in Amsterdam. He works at the cross section of these domains. Using his technical knowledge and intuition to explore the new possibilities of emerging technologies and the resulting impact on our increasingly digital society. He is one of the founding members of Manifest.AR, a collective of artists creating their works in augmented reality, the global parallel virtual universe.
